

INTRODUCING THE N2U SERIES

The next generation of nitrogen generators from the experts at Milcarb

MEET THE NITROGEN GENERATORS BEHIND SOME OF THE BEST GAS SYSTEMS ON THE PLANET.

Nitrogen has been pushing beer for decades — and it's just the beginning.

Creative operations are exploring all new ways to reap the benefits in flavor, mouthfeel, aroma, and presentation that come with nitrogenation. Craft cocktails, cold-brew coffee, beer, tea, juice — your imagination is the limit. Until your tank runs out.

Pull nitrogen out of thin air.

Experience the convenience and reliability of a cost-effective in-house nitrogen generator

No more tanks

Unlimited on-demand nitrogen

No more downtime from blown tanks

Sustainable solution without tanks on trucks

No relying on deliveries

INTRODUCING THE N2U NITROGEN GENERATOR SERIES

Meet the latest generation of innovations
from the experts at MilCarb

Small footprint

High-volume

High-purity

Sleek food grade 304 stainless steel

High-end components

Lower filter cost

Extended compressor life

Ideal price point

AVAILABLE IN:

N26C Low Volume | N216C Mid-Range Volume | N2C High Volume

INSIDE AND OUT: MILCARB DESIGN, QUALITY AND EXPERTISE

With more than a decade in the nitrogen world, Milcarb has an established industry reputation. We innovate and customize. We're the guys you call by first name.

At the front lines of beverage gas evolution AND in the trenches with customers — we're here to make you look good and make you money. And that's why we're in smooth-running systems across the U.S.A. and Canada.
